Index to Volumes I and II of The Refiner and Natural Gasoline Manufacturer

Temperature Pressure Curves of Petroleum Products Determined—M. B. Cooke, Assistant Refinery Engineer, Bureau of Mines, Vol. 1, No. 1, September, 1922, p. 7.

Chemical Treatment of Lubricating Oils—F. N. Williams, Vol. 1, No. 1, September, 1922, p. 10.

Power in Natural Gasoline Plants—J. F. Carter, Jr., Vol. 1, No. 1, September, 1922, p. 12.

Colloidal Amosphous Matter is Found in Some Paraffin Crudes—Dr. A. E. Dunstan, Vol. 1, No. 1, September, 1922, p. 27.

Absorption Plants in California Fields—Staff Representative, Vol. 1, No. 1, September, 1922, p. 20.

British Concern Operates Model Refinery—Staff Representative, Vol. 1, No. 1, September, 1922, p. 8.

Method Used by Refiners in Taking Care of Gas from Mexican Crude—Staff Representative, Vol. 1, No. 1, September, 1922, p. 24.

Gum-Forming Constituents Found in Gasoline—N. A. C. Smith, petroleum chemist, Bureau of Mines, and M. B. Cooke, Assistant Refinery Engineer, Bureau of Mines. Vol. 1, No. 2, October, 1922, p. 5.

The Manufacture of Lubricating Oils—F. N. Williams, Vol. 1, No. 2, October, 1922, p. 12.

Use of Sulphur Dioxide in Treating Oils—Moore, Morrell, and Egloff, research chemists, Universal Products Company, Vol. 1, No. 2, October, 1922, p. 22.

Corrugated Asbestos Board as Tank Roofing—Staff Representative, Vol. 1, No. 2, October, 1922, p. 8.

How About Stratification of Blended Product?—Staff Representative, Vol. 1, No. 2, October. 1922. p. 11.

Producing Naphtha from Heavier Distillates—J. V. Meigs and E. J. Ford, Boston College, Vol. 1, 3, November, 1922, p. 7.

Mexican vs. Mid-Continent Gas Oils—R. B. Harper, Vol. 1, No. 3, November, 1922, p. 9.

Methods for Determining Sediment in Oils—A. D. Bauer, Assistant Petroleum Chemist, Vol. 1, No. 3, November, 1922, p. 12.

Comparison of Paraffin and Asphalt Lubes—F. N. Williams, Vol. 1, No. 3, November, 1922, p. 13.

Engineer Says Gasoline Price too Low—Arthur Knapp, Petroleum Engineer, Vol. 1, No. 3, November, 1922, p. 14.

Decolorization by Absorption of Filtration—F. N. Williams, Vol. 1, No. 4, December, 1922, p. 2.

Absorption Process Gains Favor in Oklahoma—Grady Triplett, Vol. 1, No. 4, December, 1922, p. 9.

Development of Natural Gasoline Industry—D. E. Buchanan, Vol. 1, No. 4, December, 1922, p. 11.

Destructive Distillation of Oil Shales—Jacque C. Morrell and Gustav Egloff, research chemists, Universal Products Company, Vol. 1, No. 4, December, 1922, p. 16.

Cracking Process Discussed by Standard—Frank A. Howard, technical expert, Standard Oil Company of New Jersey. Vol. 1, No. 4, December, 1922, p. 27.

Distillation of Raw Natural Gasoline—Staff Representative, Vol. 1, No. 4, December, 1922, p. 26.

When Can Gasoline be Classed as Good?—Staff Representative, Vol. 1, No. 4, December, 1922, p. 34.

Comparison of Principles Involved in Existing Cracking Processes—Louis Reiss and E. R. Lederer, Vol. 2, No. 1, January, 1923, p. 5.

Midwest Uses Welded Pipe in Gasoline Line—Staff Representative, Vol. 2, No. 1, January, 1923, p. 10.

"Jitney Unit" is Latest Gasoline Plant—Staff Representative, Vol. 2, No. 1, January, 1923, p. 17.

The following is an index of the important articles carried in The Refiner & Natural Gasoline Manufacturer since the publication of Volume 1, No. 1. Hereafter, an index will be published twice each year, reviewing the articles carried during the preceding six months.

There are, on hand at the Houston office, 30 copies of each month's issue from May, 1923, down to date, except June and October. June issue is out of print and only a few copies which have been called on are on hand of the October issue. A few copies of issues previous to May are available.

Some Advantages of Dubbs Cracking Process—E. R. Lederer and W. F. Fulton, Vol. 2, No. 2, February, 1923, p. 0.

Jenkins Cracking Process Found Profitable—H. R. Heyne, Vol. 2, No. 2, February, 1923, p. 8.

Producing Carbon-Black by High Voltage Arc—J. J. Jakowski, Vol. 2, No. 2, February, 1923, p. 13.

The Use of Sulphuric Acid in Oil Treatment—Staff Representative, Vol. 2, No. 2, February, 1923, p. 20.

Absorption Process is Favored in California—Staff Representative, Vol. 2, No. 2, February, 1923, p. 11.

Loading and Unloading Inflammable Liquids—Staff Representative, Vol. 2, No. 2, February, 1923, p. 17.

Fleming Unit has Unusually Large Capacity—H. S. Bell, Vol. 2, No. 3, March, 1923, p. 10.

High Recovery Claim of Cross Process—Dr. Roy Cross, Vol. 2, No. 3, March, 1923, p. 12.

Electric Sparks are Used in Stevens Process—E. Webster Stevens, Vol. 2, No. 3, March, 1923, p. 17.

Hovey Process Keeps Carbon in Suspension—W. A. Mansion, Vol. 2, No. 3, March, 1923, p. 22.

Newton Process for Recovering Still Gas—B. V. Ellzey, Vol. 2, No. 4, April, 1923, p. 9.

Charcoal Method for Manufacturing Gasoline—C. L Voress, V. C. Canter, and R. W. Skoog, Vol. 2, No. 4, April, 1923, p. 11.

Welded Connections for Oklahoma Plants—Grady Triplett, Vol. 2, No. 4, April, 1923, p. 13.

Blending Distillates and Gas Condensates—George W. Reid, chief chemist, Charles F. Noble Oil & Gas Company, Vol. 2, No. 4, April, 1923, p. 14.

Congealing Temperatures of Cracked Residue—Jacque C. Morrell and Gustav Egloff, research chemists, Universal Products Company, Vol. 2, No. 4, April, 1923, p. 17.

Copper Dish and Doctor Tests No Good—J. V. Meigs and E. J. Ford, Vol. 2, No. 5, May, 1923, p. 6.

Burke-Hintze Process Described in Detail—C. R. Burke, Vol. 2, No. 5, May, 1923, p. 8.

Removing Sulphur from Natural Gasoline—D. B. Dow, Vol. 2, No. 5, May, 1923, p. 12.

The Use of Aluminum Chloride in Cracking—Louis Reiss and I. Epstein, Newark Industrial Laboratories, Newark, New Jersey, Vol. 2, No. 6, June, 1923, p. 6.

Lubrication—Its Chemical Causes and Features—A. E. Dunston and F. B. Thole, Vol. 2, No. 6, June, 1923, p. 15.

Refining Cracked Distillates vs. Light Oils—Staff Representative, Vol. 2, No. 7, July, 1923, p. 5.

Most Any Crude Will Make Absorption Oil—Harry Pennington, M. E., Vol. 2, No. 7, July, 1923, p. 9.

Using Vapor Phase Process for Cracking—Luis De Flores A. S. M. E., Chief Engineer, New England Oil Refining Campany, Boston, Vol. 2, No. 8, August, 1923, p. 7.

Daily Operating Report a Profit Maker—Harry Pennington, M. E., Vol. 2, No. 8, August, 1923, p. 11.

Correcting Feed Water is Important Item—Joseph C. Winslow, Vol. 2, No. 8, August, 1923, p. 14.

The Various Methods of Petroleum Refining—Jacque C. Morrell and Gustav Egloff, research chemists, Universal Products Company, Vol. 2, No. 9, September, 1923, p. 6.

Handling Hot Oils Real Refiner Problem—E. E. Matheson, Vol. 2, No. 9, September, 1923, p. 11.

Mixing of Air With Gas in Lines Not Only Dangerous But Cuts Production—V. Wichum, M. E., Vol. 2, No. 9, September, 1923, p. 13.

Will Fuel Oil Be Refiner's Panacea? Product Might Help Rectify Situation—Marshall Monroe, Vol. 2, No. 9, September, 1923, p. 14.

Cracking—Or Making Your Oil Pay Dividends—C. M. Johnson, M. E. chief engineer Invincible Oil Corporation, Vol. 2, No. 10, October, 1923, p. 5.

Handling Heavy Oil With Dubbs Process—Jacque C. Morrell, research chemist, Universal Products Company, Vol. 2, No. 10, October, 1923, p. 15.

Uses and Limitations of Charcoal Process—G. G. Oberfell and R. C. Alden, Vol. 2, No. 11, November, 1923, p. 7.

Pipe Stills Aid Output of Skimming Plants—F. N. Williams, Vol. 2, No. 11, November, 1923, p. 11.

Cooling Systems and Gasoline Evaporation—Ludwig Schmidt, Assistant Petroleum Engineer, Bureau of Mines, Vol. 2, No. 11, November, 1923, p. 15.

No Need for Additional Gasoline Stocks—George N. Moore, Vol. 2, No. 12, December, 1923, p. 5.

Industry Overlooking $1,000,000,000 Market—Henry L. Doherty, Vol. 2, No. 12, December, 1923, p. 8.

Viscosities of Fuel Oil From Panuco Crude—R. V. Brownlee and Wm. H. Coburn, Vol. 2, No. 12, December, 1923, p. 9.

Cooling Systems and Gasoline Evaporation—Ludwig Schmidt, Vol. 2, No. 12, December, 1923, p. 14.

Modern Equpment Increases Gasoline Yield—H. H. King, Vol. 2, No. 12, December, 1923, p. 31.

Index to Volumes I and II of The Refiner and Natural Gasoline Manufacturer

Temperature Pressure Curves of Petroleum Products Determined—M. B. Cooke, Assistant Refinery Engineer, Bureau of Mines, Vol. 1, No. 1, September, 1922, p. 7.
